

Monument Sanitation District, March 19

Request for Tri-Lakes Wastewater Treatment Facility expansion approved

By Jim Kendrick

On March 19, the Monument Sanitation District board unanimously approved a Request for Expansion of Treatment Capacity of the Tri-Lakes Wastewater Treatment Facility for a new state requirement to treat the wastewater constituent total phospho-

rus, in accordance with the facility's Joint Use of Facility's Agreement (JUA). This facility expansion request, which was submitted to the facility's Joint Use Coordinating Committee (JUC) after this meeting, is required to be submitted by JUA expansion procedures.

Monument's expansion request specifies that the ownership shares of the 264 pounds per day (ppd) of rated total phosphorus constituent treatment capacity that is being created by this facility expansion will be the same ownership percentages as currently listed

for the three special districts that own the Tri-Lakes facility for both hydraulic flow and BOD organic treatment capacity that are listed in section 3 and section 6 of the JUA:

- Woodmoor Water and Sanitation District – 64.28 percent or 169.7 ppd
- Monument Sanitation District – 19.79 percent or 52.2 ppd
- Palmer Lake Sanitation District – 15.93 percent or 42.1 ppd

The Tri-Lakes facility operates as a separate joint venture public utility. The facility is owned in equal one-third shares by Monument Sanitation District, Palmer Lake Sanitation District (PLSD), and Woodmoor Water and Sanitation District (WWSD).

The state's new Control Regulation 85 established new statewide nutrient constituent treatment requirements, including a new total phosphorus constituent effluent discharge concentration limit of 1 milligram per liter (mg/l). The Tri-Lakes facility has

Genny's Music Studio
Teaching Piano and Cello in the Tri-Lakes region for over 30 years
